

Bluestock Fintech Internship

Day 3 Report

Name: Sai Sandeep Gedela

Internship: Data Analyst Intern

Project: Mutual Fund Analytics

Date: 25 June 2026

Objective

Perform Exploratory Data Analysis (EDA) on the cleaned Mutual Fund Analytics datasets and generate meaningful business insights through visualizations.

Work Completed

Created the EDA_Analysis.ipynb notebook and analyzed the cleaned datasets. Generated 15 visualizations: NAV Trend Analysis, AUM Growth Bar Chart, SIP Inflow Trend, Category Inflow Heatmap, Investor Age Distribution, SIP Amount Box Plot, Gender Distribution, State-wise Investment Distribution, T30 vs B30 Distribution, Folio Count Growth, NAV Correlation Heatmap, Sector Allocation Donut Chart, Transaction Type Distribution, Payment Mode Distribution, and KYC Status Distribution. Exported all charts as PNG files.

Business Insights

Documented 10 key EDA findings in Markdown cells within the notebook.

Project Updates

Updated the GitHub repository, verified project outputs, and prepared the Google Drive submission with all required deliverables.

Deliverables

EDA_Analysis.ipynb
15 Exported PNG Charts
Updated GitHub Repository
Day 3 Report (PDF)
Google Drive Submission

Outcome

Successfully completed the Exploratory Data Analysis phase of the Mutual Fund Analytics project and prepared all required deliverables for submission.
